What is a battery management system (BMS)?

The product range includes battery management systems (BMS), power converters, energy storage systems, and grid stabilization solutions. These offerings provide efficient management of plug-in hybrid and electric vehicle batteries, seamless integration of solar systems, enhanced grid stability, and precise energy storage applications.

What is a BMS power converter?

The BMS ensures safe and optimized battery performance, while their power converters facilitate energy conversion and distribution. These products find applications in electric transportation, residential and commercial solar installations, grid stabilization projects, and industrial energy management.

What is a battery management control unit (SBS)?

The SBS is an integrated battery management control unit. It combines an accurate current sensor with a high performance battery management control unit. - The control unit contains all features you would expect from a modern automotive BMS as well as some unique additional functionalities.

This section provides an overview for battery management systems (bms) as well as their applications and principles. Also, please take a look at the list of 25 battery management ...
