Who makes SoliTek solar modules?

SoliTek manufactures solar modules using 100% renewable energy, ensuring high durability and performance. Known for its advanced research, SoliTek provides tailored solar solutions to residential, commercial, and industrial sectors, with products exported to major European markets, including Germany and Sweden.

Does Lithuania have a solar power plant?

An 850 kW solar power plant covers the building's facade and roof. It is also the first building in Lithuania to incorporate a solar power plant of this size into its facade. The IVC building is not connected to the city's heating network. The heating function is provided by 80 geothermal boreholes dug to a depth of 130 metres.

Can SoliTek solar modules be installed on a roof?

SoliTek solar modules are so tough that they could be installed not on the roof, but instead of roof (just as roof tiles). Yet, SoliTek doesn't stop here. Their R&D team is always on for new ways to integrate solar energy to improve daily life.

What makes ViaSolis different from other glass/glass modules?

Unlike other Glass/Glass modules on the market, ViaSolis uses innovative edge-sealant technology to protect PV cells from humidity. ViaSolis technologically advanced Glass/Glass modules can be fully customised for non-standard PV installations and Building Integrated projects.

From rooftop solar panels used in residential homes to unique solutions such as solar modules designed for carports, agriculture, or roadside barriers, ...

Compared to traditional single glass modules, double glass modules offer significant advantages, particularly in terms of efficiency and durability. The rear glass layer can absorb reflected light, ...

SoliTek specializes in innovative glass-glass solar panels, particularly in Building Integrated PV (BIPV) solutions. Their product range includes high-quality solar panels for various ...

Vilnius double-glass solar module manufacturer
