How much does a wall mounted air conditioner cost?

The average cost for installing a single-zone wall mounted air conditioner in the U.S. ranges from \$2,200 to \$5,400. This all-in estimate includes the equipment, professional labor, basic line sets, and mounting hardware. Multi-zone systems supporting more rooms typically increase the price by \$800 to \$2,500 per additional indoor unit (zone).

What is a wall mounted air conditioner?

A wall mounted air conditioner, often categorized as a ductless mini-split, consists of two main parts: an indoor unit mounted high on the wall and an outdoor compressor/condenser. Connected by refrigerant lines through a small wall opening, these systems provide both cooling and heating in many models.

Are wall mounted AC systems more expensive?

Wall mounted systems tend to cost less than full ducted HVAC if only select areas or additions need cooling. For whole-home cooling, central air is more cost-competitive in homes with existing ductwork. Are Wall Mounted ACs Expensive To Run?
