What are the new packaging requirements for lithium ion batteries?

Revised Packing Instructions: More stringent requirements for UN-certified packaging, capable of withstanding specific drop tests. State of Charge (SoC) Emphasis: Increased scrutiny on the SoC for standalone lithium-ion battery shipments, with a general requirement not to exceed 30% of rated capacity.

When will a lithium ion battery be available for transport?

For IATA PI966 SEC I: starting from 01. Jan. 2026 Lithium ion cells and batteries must be offered for transport at a state of charge (SoC) not exceeding 30% of their rated design capacity! For IATA PI967 SEC I: starting from 01.

Do air carriers have supplemental policies & limitations on lithium battery shipments?

Many air carriers have supplemental policies and/or limitations with respect to lithium battery shipments. These requirements can often be found by consulting directly with the air carrier or International Air Transport Association (IATA) publications.

What types of batteries are used in a cargo transport unit?

o Vehicles--Package or shipment contains a vehicle powered by lithium batteries: o UN3171, Battery-powered vehicle o Cargo Transport Unit --Lithium batteries installed in a cargo transport unit and designed only to provide power external to the cargo transport unit.

Lithium-ion and lithium-metal batteries are the two main types subject to international transport regulations. Their classification ...

The following notes, based on recommendations, have been produced to provide initial practical guidance to the regulations for the carriage of lithium ion batteries and lithium ion batteries ...

Lithium-ion and lithium-metal batteries are the two main types subject to international transport regulations. Their classification determines how they must be packed, ...
