Can 5G help build a marine information highway?

Introducing 5G to smart ocean can help build a marine information highway and enables terrestrial and marine networks to provide the same experience for users." The GSMA is a global organisation unifying the mobile ecosystem to discover, develop and deliver innovation foundational to positive business environments and societal change.

What is 5G marine network & how does it work?

In Ningde, China Mobile and Huawei have built a showcase 5G marine network to provide coverage up to 50 km offshore. The network employs tall radio masts transmitting over a mixture of frequency bands, supplemented by network technologies and techniques designed to optimise coverage at sea.

How will 5G help China's offshore wind turbines?

In the energy sector, 5G could be used to bring connectivity to China's 14,000 offshore wind turbines, which are on average 22 km offshore. Furthermore, 5G could be the basis for an integrated marine emergency command information system to support rescue operations.

What is 5G SA & why is it important?

Many advanced operators are now prioritizing network densification while cautiously transitioning to a new 5G core architecture with standalone (SA), seeking to unlock new monetization opportunities through the enhanced flexibility, agility, and performance that 5G SA enables.

Evergreen Marine Corp. has partnered with Chunghwa Telecom to launch smart container operations at the seventh terminal of Kaohsiung Port. This initiative marks a major ...

Explore a global map showing where 5G Standalone and Non-Standalone networks are available around the world, powered by ...

SoftBank is preparing to commercialize its next-generation telecommunications infrastructure using high-altitude platforms by 2026, marking a pivotal milestone in its UTX ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Explore a global map showing where 5G Standalone and Non-Standalone networks are available around the world, powered by real-world Speedtest data.

The Japanese telecommunication industry is hoping to reestablish its mark once again on the global map by deploying flying ...

Evergreen Marine said it integrated Chunghwa Telecom's 5G and fiber-optic networks at its operations hub at Kaohsiung Port. The enhanced connectivity enables real ...

This article will discuss how these flying solar 5G platforms function. Later, I will share other ways we're helping more people connect ...

SoftBank is preparing to commercialize its next-generation telecommunications infrastructure using high-altitude platforms by 2026, ...

The Japanese telecommunication industry is hoping to reestablish its mark once again on the global map by deploying flying base stations in 2025.

This article will discuss how these flying solar 5G platforms function. Later, I will share other ways we're helping more people connect to the Internet.
