SGS offers comprehensive testing services for electric vehicle batteries. Talk to us today.

What does a Battery Testing Service do?

Testing services for battery cells, modules and entire systems, from small hybrids to full electric cars. The battery is the key component of the electric vehicle.

How are battery tests conducted?

All battery tests are conducted in accordance with international standards and original equipment manufacturer (OEM) specifications including ISO, IEC, UN ECE, SAE, LV, AK and many more. We can also perform bespoke tests to customer requirements, if required. Electromobility is undergoing rapid technological change.

What are the requirements for a battery transport test?

All batteries must pass the UN 38.3 transport test, which is carried out in line with our DIN/EN/ISO/IEC 17025 accreditation. We also offer: Detailed specifications can also be tested, including:
