Does Morocco have a strong energy sector?

Morocco has a modest yet growing energy sector. The country's power generation remained relatively limited in recent years, especially compared to other North African producers such as Algeria and Egypt. Because of that, Morocco relies on energy imports to satisfy the growing domestic demand.

How can Morocco improve the security of the energy supply?

The Government of Morocco seeks to increase the security of the energy supply by reducing dependence on imports, including increasing the use of renewable sources for electricity production. As of the end of 2023, the share of renewable energy in the electrical capacity mix stood 11.42 GW (ANRE data).

Will Morocco develop a gas-fired power plant in 2025?

On April 23, 2025, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure for natural gas reception, storage, re-gasification, and transport, alongside a gas-fired power plant.

Does Morocco have a Green Hydrogen strategy?

Morocco was the first country in the region to adopt a National Strategy for Green Hydrogen, which it unveiled in 2021. The strategy includes a timeline spanning from 2020 to 2050 and identifies various steps toward possible applications of green hydrogen in the economy.

With a vast renewable capacity, the country is developing one of Africa's largest clean energy sectors, mainly by exploiting wind, solar, ...

Using energy storage and green hydrogen among others, Morocco aims to increase the share of renewables in its total power capacity to 52% by 2030, 70% by 2040 and 80% by 2050.
