As one of Africa's largest nations, the DRC possesses immense natural resources and vast renewable energy potential. ...

Acknowledgements International Rivers acknowledges the researchers and experts, Drs Ranjit Deshmukh, Ana Mileva and Grace Wu, who gathered and analysed the data presented in the ...

This paper has investigated the use of renewable energy source such as wind or photovoltaic systems for the development and deployment of electric Tuk-tuk battery charging ...

JNTech's hybrid solar-diesel microgrid systems are at the forefront of transforming the DRC's energy landscape. With continued investment and innovation, these systems ...

a/yr Indicators of renewable resource potential Solar PV: Solar resource potential has been divided into seven classes, each representing a range of ann. al PV output per unit of capacity ...

Summary: Discover how photovoltaic materials and energy storage systems are transforming renewable energy adoption in the Democratic Republic of Congo. Learn about cutting-edge ...

This infographic summarizes results from simulations that demonstrate the ability of Congo, DR to match all-purpose energy demand with wind-water-solar (WWS) electricity and ...

Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million house-holds, only 1.6 million have have access to electricity.
